As a passionate Business Owner, of Luna's Angels Adult Best Care, I, Vanessa A Luna enjoy caring for people during all stages of life. Be it the individuals going through, anxiety, depression, retirement, dementia, Alzheimer's, terminal illness, or caring for an elder.

At the current time I am working on building the gap between educated and raising awareness to grow understanding of the Alzheimer's disease by caring for those with the brain condition which slowly damages the memory, thinking, learning and organizational skills of our loved ones and Friends.

Anger, frustration, concern and caring for others started at the age of 16 years of age when I realized there was nothing, "at the time", I could do for my ill grandmother. I immediately joined the American Red cross while I was still in high school. After graduation I attended Wharton County Junior College while working for the Department of Defense as an ASVAB administrator which allowed me to pay for my paramedic associates degree. A handful of years went by and I was still not satisfied so, I continued my education at Houston community college with an associate of arts in Microsoft office certification and an associate in business administration. Still not satisfied I continued my education with Houston community college towards acquiring more credits to transfer to Houston Christian University AKA Houston Baptist University. While there I attained my bachelors of science in nursing and psychology. With this knowledge I wish to assist with the accelerating global research for early detection and maximizing quality care and support for Alzheimer's individuals.

While not working, my passion is for the special need's individuals, be them young or old. I've been a special Olympics soccer coach for 15 years. Other curricular activities would be dancing, riding horses, traveling, the Houston arts district, be it music, plays, or theater, and meeting new people.
